Kit Marelli ECU by Aprilia Racing - *COE13021*

ECU configuration: **RF1301-xx** *(RSV4 factory aprc)*

Features:

- ➢ *Optimized Traction control Management (TCS):*
  - o *Less invasive in every selected level.*
  - o *Optimized behavior especially at high lean angles and quick direction changes.*
- ➢ *Optimized Anti Wheelie torque management at level 1.*
- ➢ *Optimized Launch Control System at level 1.*
- ➢ *Reduced Engine braking, especially in lower gears.*
- ➢ *New Rev. Limiter:*
  - o **13000** *RPM in 1,2,3 and 4 gear.*
  - o **13300** *RPM in 5 and 6 gear.*
- ➢ *Full power Engine maps, optimized for racing exhausts.*
- ➢ *Possibility to choose among three maps:*
  - **T** – *direct Throttle response, recommended for expert riders.*
  - **S** – *T map with a softer response at lower throttle position. Recommended for NON-expert riders or for low grip conditions.*
  - **R** – *T map with an even more reduced engine braking.*
- ➢ *Without immobilizer.*
- ➢ *Can also be used on RSV4 Factory, with ABS.*

N.B.: Included manual with installation instructions.

IMPORTANT NOTES:

- *The use of this ECU is allowed ONLY for racing activities in circuits, and in every case NOT for a standard use in public roads.*
- *This ECU must be installed only by expert staff. It requires a dedicated palm instrument to set the internal correct tuning parameters.*
- *This ECU has no guarantee. Aprilia Racing decline any kind of responsibility for problems or damages caused from its use.*
- *Please, Remind always that unsafe electronic parameters can cause damages to the bike and its riders.*
